

PACKAGING 20 KG

The packaging has a certificate for transport of dangerous goods and has undergone all the required tests of Sweden's National Testing and Research Institute (SP).

The box has high durability and it is waterproofed against damp. By means of melted glue technique, the box has a strong and durable seal. It is also equipped with flaps which facilitates the opening. All boxes which leave the packaging line are marked with product name, quality, weight and lot number for traceability. The box is also recyclable.
